TITLE : INFORMATION MANAGING AND TRANSMITTING SYSTEM

ABSTRACT : PURPOSE: To offer the latest information only to a necessary terminal at a real time, by providing a means for grasping and managing the information required for a terminal side, from a host computer side.

CONSTITUTION: A titled system consists of a terminal for inputting a variation of stock prices, a host computer 2, a stock price information file 3, a manage table 4 of a terminal which requires hourly information, and a stock price display terminal 5. When a variation of stock prices is inputted to the computer 2 from the input terminal 1, the contents of the stock price file are updated to the latest stock prices. At the same time, when the name of a terminal which requires the latest stock prices is known by seeing the terminal manage table, the computer 2 sends the latest stock prices to the terminal 1 and a terminal 10. In this way, the latest information is transferred at a real time only to a terminal which requires its information.
